No. 7997.

FROM THE HON'BLE SURGEON-GENERAL W. H. B. ROBINSON, C.B., I.M.S.,
Surgeon-General with the Government of Bengal.

TO THE SECRETARY TO THE GOVERNMENT OF BENGAL,
FINANCIAL (MEDICAL) DEPARTMENT.

Dated Calcutta, the 22nd May 1918.

SIR,

I HAVE the honour to submit the following short notes on the working of hospitals and dispensaries in this Presidency for the year 1917 together with the usual statistical returns.

CALCUTTA HOSPITALS AND DISPENSARIES.

2. **Number.**—The number of the Calcutta Medical Institutions remained the same as in 1916, viz., 22.

3. **Patients.**—Altogether 31,572 intern patients were treated in the 15 Calcutta Hospitals providing in-door accommodation, as compared with 31,507 in 1916. The daily average number of such patients in classes I, III and IV Institutions was 1615·16 against 1538·84 in the preceding year. There was a noticeable increase in the in-door attendance at the Dufferin Hospital (412, mostly midwifery cases), the Presidency General Hospital (191), the Howrah General Hospital (120), and the Medical College Hospital (113), while the attendance fell off by 287 at the Campbell Hospital owing to a smaller admission from epidemic diseases and by 140 at the Mayo Hospital.

The out-door attendance at the Calcutta Hospitals considerably increased last year, 4,06,832 patients having been afforded out-door relief as compared with 3,77,420 in 1916 or an increase of 7·7 per cent. The largest increase (11,300), occurred in the Kalighat Ram Chandra Goenka Hospital. But this institution worked only for 3 months in 1916 during which only 2,900 patients were treated in it. Nevertheless, it is very satisfactory that this new institution has, within a very short time, gained such a large popularity. The large increase of 10,982 patients at the Syama Charan Law Eye Infirmary is an indication of the great confidence of the public in this institution. It is unfortunate that no steps could so far be taken to commence work on the proposed new Eye Hospital for want of funds.

4. **Beds.**—The accommodation available in the Calcutta In-door Hospitals remained almost unchanged, the number of beds was 2,327 in 1917 as compared with 2,323 in the preceding year.

5. **Mortality.**—As far as the in-patients of classes I, III and IV institutions were concerned, the death-rate was practically the same as in 1916, it having been 10·78 per cent. against 10·80 per cent.

6. **Nursing.**—The nursing of patients of the Calcutta Hospitals was generally satisfactory. However, owing to the higher emoluments offered for

nursing in the War Hospitals and the demand for private nursing, increasing difficulties were experienced in almost all Hospitals in obtaining nurses and also in keeping them when obtained. Many hospitals had consequently to work with a decreased staff during the greater part of the year.

7. **Diseases.**—Both *Chôlera* and *Small-pox* were less prevalent last year than in 1916, the death-rate among the general population having been '96 and '03 per mille respectively in 1917 against 1'5 and '06 per mille in the preceding year. The attendance at Hospitals for these diseases was consequently very small, viz., 577 and 44, respectively, as compared with 746 and 73 in 1916.

The city was free from *Plague* for 7 months of the year, viz., in January and February and from August to the end of the year. There were 87 cases and 81 deaths among the general population as compared with 82 and 78 in 1916. Plague cases treated in Hospitals numbered 18 only as compared with 23 in 1916.

The number of *Phthisis* patients diminished from 2,447 in 1916 to 2,197 in the year under notice. Three hundred and twenty-six deaths occurred among 754 treated as in-door patients (or 43'2 per cent.) as compared with 339 deaths among 767 patients (or 44'2 per cent.) in 1916. The largest number was treated at the Medical College Hospital, viz., 855 (115 in-patients and 740 out-patients). The Tuberculosis Ward on the roof that was under construction was completed last year, but was not occupied.

Patients treated for *Venereal* diseases numbered 19,642, which was 1,153 more than the number for 1916. Venereal patients attended the Presidency General Hospital in increasing numbers last year (535 against 478 in 1916) for treatment by injection of Novo-arseno-benzol preparations. The Voluntary Venereal Hospital had 794 venereal patients (all females) as compared with 736 in the previous year.

Government gave careful consideration to the recommendations made by the Royal Commission on *Venereal* diseases and have proposed to give effect to the following measures for the prevention and treatment of these diseases in this Presidency :—(1) to open Skin Departments, in connection with the Medical College and the medical schools, for the practical instruction of medical students in *Venereal* and Skin diseases; (2) to distribute to Venereal patients, cards of instructions and warning, (3) to extend the Imperial Serological Laboratory at Calcutta, for the better diagnosis of these diseases by the laboratory methods, and (4) to supply gratuitously Salvarsan or its substitutes, to all hospitals and dispensaries for the free treatment of Venereal patients. Schemes have been sketched out which are now under consideration.

Special attention was paid by Lt.-Col. Waters, I.M.S., Civil Surgeon of Howrah, to the treatment of *Diabetes*, by Alimentary rest and it is reported that many interesting cases were treated by this method and valuable results obtained.

Major D. McCay, I.M.S., Professor of Physiology, Medical College, Calcutta, continued his investigation into the causation and prevalence of Diabetes in India, the term of the enquiry having had been extended up to the end of the year. It has again been extended by 6 months this year and Major McCay is now engaged in writing a detailed report on the results so far obtained.

8. **Surgical operations.**—Altogether 46,210 surgical operations were performed in all classes of the Calcutta Institutions, against 45,159 in 1916 or an increase of 1,051. The largest increase occurred in the Campbell Hospital where 1,724 more operations were done than in the previous year, this is largely due to an increase in the number of intravenous injections. Selected operations performed in classes I, III and IV institutions numbered 5,650 as compared with 5,561 in 1916. Extraction of lens formed the largest number of selected operations, being 1,345, of which 978 were performed in the Syama Charan Law Eye Infirmary and 220 in the Mayo Hospital. Abdominal Sections (other than obstetrical) numbered 714, of which 231 were done in the Medical College Hospital and 183 in the Eden Hospital. There were 408 obstetric operations, more than half of these were done in the Eden Hospital : 104 were performed at the Dufferin Hospital, Calcutta.

Officers who performed a large number of important operations were, Lieutenant Colonel F. P. Maynard, I.M.S. (1,232), Lieutenant Colonel R. P. Wilson, I.M.S. (341), Major H. B. Steen I.M.S. (327), late Lieutenant Colonel R. Bird, I.M.S. (230), Dr. M. V. Webb, W. M. S. (184), Assistant Surgeons K. K. Chatterji (448), Jatindra Mohan Das (Resident Surgeon, Eden Hospital—413), and Kedar Nath Das (217).

9. **Finance.**—The total income of the Calcutta Hospitals of classes I, III and IV amounted to Rs. 17,27,281 last year, against Rs. 14,55,724 in the previous year or an increase of Rs. 2,71,557. Government paid Rs. 10,96,076 or Rs. 1,38,506 in excess of what it gave in 1916. The two noticeable Government contributions of the past year were Rs. 1,66,873 given towards the cost of land and building for the servants' quarters, Medical College Hospitals, and Rs. 16,800 paid to the Albert Victor Hospital, Belgachia. Municipal contributions increased from Rs. 1,02,944 in 1916 to Rs. 1,32,805 being 7.68 per cent. of the total income as compared with 7.08 per cent. in 1916. The Belgachia Hospital was the recipient of practically the whole of this increased Municipal contribution, the Calcutta Corporation having increased its grant to this Hospital from Rs. 2,500 to Rs. 30,000 last year. The income from subscriptions and donations amounted to Rs. 1,20,267 or 6.96 per cent. of the total as compared with Rs. 55,818 or 3.83 per cent. in 1916. The largest donation, viz., Rs. 50,000 was given by Rai Buldeo Das Birla Bahadur for the construction of a Tuberculosis Ward in the Medical College Hospital. The Mayo Hospital received a further legacy of Rs. 6,916 from the estate of late Mr. Ross Hildebrand of London referred to in the last Triennial Report. Babus Harish Chandra Mazumdar and Nanda Lal Sil each donated Rs. 3,000 to the Albert Victor Hospital, Belgachia, for endowing beds. Babu Onkar Mull Jatia bore the cost of constructing a Gynæcological Theatre in the Howrah General Hospital amounting to Rs. 5,000.

The total expenditure of the Hospitals (excluding investments) amounted to Rs. 16,42,995 which is Rs. 2,14,483 more than the expenditure for 1916. Building charges are primarily responsible for this excess, Rs. 46,959 having been spent on the Tuberculosis Ward, Medical College Hospital, referred to before and Rs. 1,66,873 towards the servants' quarters. Salaries of medical officers cost Rs. 23,801 more than in 1916; this excess represents dues of previous years that were paid during the year under notice.

DISTRICT HOSPITALS AND DISPENSARIES.

10. **Number.**—There were 700 dispensaries in operation at the beginning of the year, 28 were opened during the year and 4 closed. The number of working dispensaries on the list was therefore 724 at the end of the year. Of the new dispensaries, 18 are District Board Institutions, 8 private (viz., 3 aided and 5 non-aided) and two Railway Dispensaries. The District Board Dispensaries were distributed as follows—3 each in the districts of 24-Parganas and Rungpur, 2 each in the Burdwan, Hooghly, Murshidabad and Dacca Districts, and one each in Bakarganj, Noakhali, Rajshahi and Pabna. Besides the above regular Institutions, a number of temporary dispensaries was also at work in certain districts in connection with Fairs and outbreaks of epidemic diseases.

As the result of Government Order No. 271-75 T-Medical dated the 18th September 1917, District Boards have taken up the question of establishing more Dispensaries in their districts and it is expected that the current year will see several new dispensaries coming into existence. The most expensive item of expenditure involved in the opening of dispensaries is the cost of building, which varies from Rs. 5,624 to Rs. 8,436, according to the locality; this again is the pre-war estimate, the present rates are at least 20 per cent. higher. This heavy initial charge has been the stumbling block to many District Boards; therefore, in several cases a deviation from the standard plan, as far as this could be done without sacrificing efficiency, has been agreed to.

11. **Patients treated.**—Altogether 63,40,564 patients received medical aid in the Presidency outside Calcutta as compared with 59,72,517 in the

previous year, or an increase of 3,68,047. Of this excess, 3,00,240 occurred in the old dispensaries, which is remarkable in a healthy year like 1917. Patients who received in-door treatment numbered 65,617 and those who sought out-door relief only, 61,89,602, while the number of extramural patients, *i.e.*, those who received medical relief at Hâts, Fairs, Railway lines, etc., was 85,345. The corresponding figures for the preceding year were 61,936, 57,61,224 and 1,49,357 respectively.

The daily average number of intern patients in classes I, III and IV Dispensaries increased; it was 1,529·09 in 1917 against 1,519·97 in 1916. Deaths were however fewer, the ratio per cent. of patients having been 7·08 against 8·54 in 1916. The daily average of extern patients also increased from 22,033·60 in 1916 to 24,632·12 in 1917.

12. **Beds.**—All Hospitals considered, there was an increase of 83 beds, the total number of beds having been 4,286 last year against 4,203 in 1916. The increase occurred almost entirely in classes I, III and IV institutions where accommodation for 2,547 patients was available as compared with 2,466 in 1916.

13. **Diseases.**—The largest attendance was as usual for *Malaria*, 16,19,239 patients having been treated for that disease last year in the District Hospitals, which is 2,03,076 in excess of the number for 1916. Owing to the insufficient supply of quinine, it was not possible for many dispensaries to treat malaria patients with full doses: local reports show that subcutaneous and intravenous treatment is being more and more resorted to with marked success.

Small-pox was much less prevalent last year than in 1916, there having been only 6,982 deaths among the general population against 13,832 in 1916. Hospital attendance shows a corresponding falling off, viz., from 551 in 1916 to 219 in the year under report. Only 10 cases of *Plague* were treated in District Hospitals last year as compared with 31 in 1916. Cases of *Kala-Azar* increased from 740 (with 26 deaths) in 1916 to 1,846 (with 41 deaths) last year. Many of these cases (748) were treated at the Kalna Mission Hospital in Burdwan, by the injection of Tartar Emetic with great success.

There was a slight increase in the number of patients treated for *Tubercle of the Lung*, the number of such patients having been 4,696 against 4,619 in 1916. The death-rate amongst those treated at in-door dispensaries was almost the same in both years.

Cases of *Venereal* diseases treated in the district hospitals and dispensaries numbered 61,630 last year as compared with 59,539 in the previous year. Medical Officers have been instructed to keep a separate record of venereal patients treated with Salvarsan.

One thousand one hundred and eighty-five patients suffering from *Leprosy* were treated in the District Hospitals and Dispensaries last year against 1,136 in 1916. Besides this, the 3 Leper Asylums at Bankura, Raniganj and Gobra housed and treated 824 Leper patients as compared with 798 in the previous year. The investigation into the efficacy of Gynocardate of Soda in curing Leprosy in which Lieutenant-Colonel Sir Leonard Rogers, I.M.S., is engaged was carried on by him at the Gobra Leper Asylum. He reports:—

“During the last 6 months or so, I have been using a preparation of a higher melting point acid than that recorded previously, which I had found to be more active in my experiments at the Medical College. * * * Since this salt has been in use, progress has been greater in the very advanced and chronic cases. * * * In several cases, old standing and deep perforating ulcers, some of one or two years' duration, have been healed and in a few cases some return of sensation has also been noted.”

He adds:—

“I have recently made what promises to be a further advance by obtaining from Cod-liver Oil a soluble preparation made on similar lines to Gynocardate of Soda, which has the great advantage of producing reactions and apparent improvement when given subcutaneously in small and practically painless doses.”

In August 1917 Government of India sanctioned an investigation into *Hookworm* infestation in Bengal through the agency of the Deputy Sanitary Commissioners assisted by 4 Sub-Assistant Surgeons. It was ordered that the preliminary enquiry should be made in Jails and, for this purpose, the

Deputy Sanitary Commissioners and the Sub-Assistant Surgeons have been trained in the work by Lieutenant-Colonel C. A. Lane, I.M.S., Civil Surgeon of Hooghly.

14. **Surgical Operations.**—In Surgical work there was an increase of 6,404 operations in Mufassil Hospitals and Dispensaries of all classes, Mission Hospitals and Railway lines taken together, the total figures being 1,66,516 against 1,60,112 in 1916. 7,151 selected and important operations were performed in the hospitals of classes I, III and IV last year against 6,070 in 1916. The figure for last year includes 1,393 cases of Extraction of Lens; 261 of which were performed at the Berhampore Hospital, 255 at the Fraser Hospital, Burdwan, and 149 at the Mitford Hospital, Dacca; there were 341 Obstetric operations, 54 of which were done at the Fraser Hospital, Burdwan; and 224 Abdominal Sections (for other purposes than obstetrical) including 8 Ovariectomies.

The names of the following officers may be mentioned as having performed a large number of selected and important operations :—Dr. Satis Chandra De, Civil Surgeon of Burdwan, who did 469 such operations; Major A. S. M. Peebles, I.M.S., Civil Surgeon of Murshidabad, 382; Assistant Surgeon Satish Chandra Ghosh of the Chittagong Hospital, 263; Sub-Assistant Surgeon Satis Chandra Sanyal of the Munshiganj Subdivision, 220; Assistant Surgeon Upendra Nath Roy of the Rampur Boalia Hospital, 193; Assistant Surgeon Jogendra Nath Mitra, Mitford Hospital, Dacca, 191; Assistant Surgeon Atindra Nath Sen of the Berhampore Hospital, 180; and Lt.-Col. E. A. R. Newman, I.M.S., Civil Surgeon of Dacca, 156.

15. **Finance.**—The total income of District Hospitals and Dispensaries of classes I, III and IV amounted to Rs. 13,42,699 and their expenditure (excluding amounts invested) Rs. 13,15,534 in the year under notice, as compared with Rs. 12,50,070 and Rs. 12,48,450, respectively, in the preceding year. The largest income was as usual derived from local funds, viz., Rs. 5,38,791; it was 40.1 per cent. of the total income from all sources. The income from this source for 1916 was Rs. 5,16,433 or 41.31 per cent. of the total income for that year. Government contribution was Rs. 10,467 in excess of that for 1916; Divisional Commissioners gave Rs. 36,116 for equipment, apparatus, structural improvements, etc. Municipal contributions increased by Rs. 15,579. Receipts from subscriptions and donations amounted to Rs. 2,67,595 (viz., Rs. 49,579 from Europeans and Rs. 2,18,016 from Indians), or 19.93 per cent. of the total as compared with Rs. 2,57,041 or 20.56 per cent. in 1916. The notable donations of the past year were :—Rs. 16,779 given by Raja Rao Jogendra Narayan Ray Bahadur of Lalgola to the Berhampore Hospital for the endowment of 27 beds; Rs. 13,000 by Babu Tulsi Das Kumar for the maintenance and equipment of the Sultanpore Dispensary in the district of Burdwan; Rs. 12,000 by Rai Sada Niranjana Chakravarty Bahadur of Hetampore for the construction of a new in-door Hospital at Suri; Rs. 4,500 by Rani Dinamani Choudhurani of Santosh for furniture and equipment of the female ward of the Mitford Hospital, Dacca; Rs. 4,000 by Babu Bhola Nath Mukherji for the maintenance of the Panchra Dispensary in Burdwan; Rs. 3,113 and Rs. 3,000 given by the Hon'ble Maharajah Sir Manindra Chandra Nandi, K.C.I.E., of Kassimbazar for the up-keep of the Ulipur Dispensary in Rangpur and for improvements to the Berhampore Hospital, respectively.

16. **Improvements.**—The work of remodelling the Dacca Mitford Hospital buildings made considerable progress; the following buildings were completed in 1917, a block for menials; a female surgical and obstetrical ward; and an administrative block. The construction of a new Hospital at Mymensingh could not be completed last year for want of funds, a grant of Rs. 50,000 has however been given by Government in March last for the purpose. The construction of an in-door Hospital at Suri was taken in hand. Phthisis wards were constructed in the Comilla and Jalpaiguri Hospitals at a cost of Rs. 1,870 and Rs. 3,500, respectively, provided by Government. The Rangpur Sadar Hospital had the following works carried out at an aggregate cost of Rs. 15,300 :—construction of the medical ward, infectious diseases ward, mortuary, a cottage ward, verandahs to the Female and Tuberculosis wards.

17. **Inspections.**—My predecessor Surgeon-General Edwards visited 38 Hospitals last year, viz. 35 at Sadar Stations and 3 in outlying places. Miss Wickham, L.R.C.P. & S. (Edin.) of the Women's Medical Service was deputed last year by the Central Committee of the Countess of Dufferin Fund, to act as the Assistant to the Surgeon General for the inspection of Women's Hospitals in this Presidency; she arrived here on the 21st November 1917 and worked till the 3rd week of March 1918; during this time she inspected 26 Female Dispensaries, viz., 9 in 1917 and the rest in 1918, and made very valuable suggestions for the improvement of these institutions.

I have the honour to be,

SIR,

Your most obedient servant,

W. H. B. ROBINSON,

Surgeon-General with the Govt. of Bengal.

* The increase of the opening balance by Rs. 1,550 than the closing balance of the previous year was due to the inclusion of the accounts

† This includes grant of Rs. 4,000 towards Her Excellency's Nursing scheme and Rs. 750 from the Jalapahar Cantonment.

‡ Of this, Rs. 2,736 represents closing balance of the Nursing Scheme Fund.

(a) From the Darjeeling Improvement Fund committee.

(b) Of this, Rs. 2,938 from the Darjeeling Improvement Fund.

H—concluded.

and Private-Aided Dispensaries in Bengal during the year 1917.
